ASI Campus Laundry Solutions

LaundryAlert™

THE BUSY STUDENTS BEST FRIEND!

Analyzed data show students spend an average of one minute on a laundry monitoring website. LaundryAlert™ is an easy-to-use website that gives students a quick-glance status report of machines available or in use. Other sites are complicated with unnecessary distractions. That is why ASI and LaundryAlert™ have partnered to create a site that is quick and easy for students to understand and use from a phone or computer. LaundryAlert™ is extremely reliable and is the monitoring system most utilized by commercial laundry providers.

RED FLAG ALERT
This new, time-saving technology will provide notifications to indicate when a washer / dryer shows little or no activity. Red Flag Alert will notify ASI service technicians to check the machine before students are inconvenienced.

TEXT / EMAIL NOTIFICATION
A notification can be sent via text or email when your laundry is finished.

USE A SMART PHONE TO ACCESS THE WEBSITE
A QR code will be placed on signs in the laundry room, which allows a quick, easy way for students to connect to the LaundryAlert™ site.
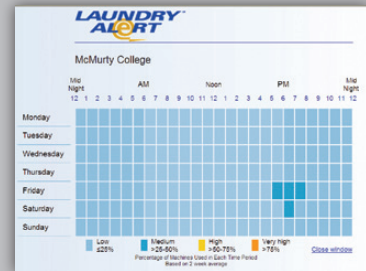

REQUEST SERVICE
The request service button is conveniently located on every page (request service links the student directly to the ASI service page) of the LaundryAlert™ site, making it easy and convenient for students to request service 24 / 7 / 365.

FIND THE BEST TIME TO DO LAUNDRY
LaundryAlert™ provides a quick look usage chart for students. They can now plan when the laundry room is slow and the best day to do laundry.

WHAT STUDENTS SEE WHILE USING LAUNDRYALERT™

To experience LaundryAlert™ as a student would, go to laundryalert.com and enter the code uofl4018.
